

Beloved brothers and sisters,

On so many places in the world the forests are burning down and we quickly feel a deep grieving mixed with uncertainty how this could have influences on the whole planet earth. Easily we can point our finger to blame the „responsible ones“! But what is happening there has happened here in Uganda as well some decades ago. Even this country had much more tropical rainforest and was cut down!

But we should compensate what is on us and so here is the plan: We want to reforestate Uganda again!!!
Are you with us?!?

These trees we are going to plant will be giving shade but also produce oxygen! We invite you and all your dear ones around you to improve the air quality and take over one or more tree sponsorships! We will also have Mahagoni and Teak with many other local trees planted.
The sponsorship for one tree is 10 Euro.

Please name the purpose of donation „Tree sponsorships“

Maybe someone can also advertise in schools and encourage children to participate!

Thank you for your giving heart!!!

God bless you all!

Psalms 115:16

„The highest heavens belong to the Lord,
**BUT THE EARTH HE HAS GIVEN
TO MANKIND.“**
